

Dear Residents of Alvarado Trail.

September 8th,2011

Starting this week (Sept 6-9) earth work will begin on the new road ways and services for Phase 8C. Please find attached map showing the area that will be under construction (Homes 36-65).

Rykon has hired TT Construction to do this work. TT has been advised to take all necessary steps to help mitigate dust. Unfortunately, the soil conditions and the nature of this work make it impossible to avoid dust. TT will be tasked with monitoring the dust situation on an ongoing basis.

Every effort will be made to complete the curbs and asphalt before winter; however, this timeline might vary given that this work is weather dependent.

If you have any questions about this work please contact me directly.

Sincerely,

A handwritten signature in blue ink, appearing to read 'PP', with a long horizontal flourish extending to the right.

Paul Perschon
