Dear Residents of Sonoma Pines,

We're almost done! Programming of remotes to operate the new lower gates has been going very smoothly, and is almost complete. I'd like to thank to the following volunteers, who made their time available to help:

Gerry Tonn

Nick Schritt

Diane Murray

Ed Murray

Doug Armet

Jim Kay

Mike Delaney

Susan Krepstskie

Rick Seitz

Today (12pm-4pm) is the last scheduled programming session!

Programming is taking place in the Rykon Construction Office, located at 2156 Alvarado Trail, where signs will direct you to the side entrance and remote programming area.

WHAT TO BRING: All garage door (and Phase 3 gate) remote openers, designated for your address at Sonoma Pines.

After today, programming will take place outside at the gate; limited times **during normal business hours** will be scheduled, subject to availability of Rykon Construction staff. **An alternative schedule will be forthcoming for those who have been away or unable to attend during the dates and times provided.**

 **Come today while programming is done in a nice warm office!** 

The installation of the gates is scheduled to begin today. Over the next two weeks, there will be lots of activity as several contractors complete their respective portions of the project. Residents will be notified when installation and set up is complete, and prior to the closure of the new gates.

Sincerely,

Kimberly Westgate

Assistant Project Manager,

Rykon Construction Management Ltd.
